branch master

Project By – Anurag Kumar

Trainer – Dhruvik

Batch – MS FSD APR 2021 Cohort 1

Project Details :-

- It's a MVC project designed using the java in the backend and hibernate and JPA with concepts of spring framework.
- It has a login page which for the authentication is done using the tables referenced User.java class in the project.
- I have used jar files and all those jar files have been kept in the lib folder...
- Once the project runs it takes the user to the index page and user can Sign/SignUp..
- To Login, one can register as a new user as a Customer Registration.
- The options provided are Add, Remove, Update and Show all the products...
- ADMIN has the option to change the Login Password.
- The features include searching Customers first name, and last name.
- Also Purchase Reports Filter Include : Purchase via Date
- On the Customer's Page, All products will be listed along with the Option to Buy

Concepts Used :-

- Core Java
- Spring Core Framework
- Spring Boot
- Spring JPA
- Spring MVC
- JSP on Html 5
- MySQL
